

2018 Conference & Exhibition in numbers

With 252 global exhibitors and 9815 participants in total, the exhibition again proved to be a valuable networking place in the Congress, where exhibitors and delegates exchanged solutions and innovations to shape our water future. The exhibition presented a full picture of the global water sector: water utilities, governments, consultants, contractors and technology providers presented their contribution to sustainable solutions globally. These exhibitors included Country pavilions with their clustered approaches and solutions from e.g. Japan, Denmark, Nordic area, Netherlands, Belgium, China, Australia, Chinese Taipei and an African Pavilion with contributions from many African countries.

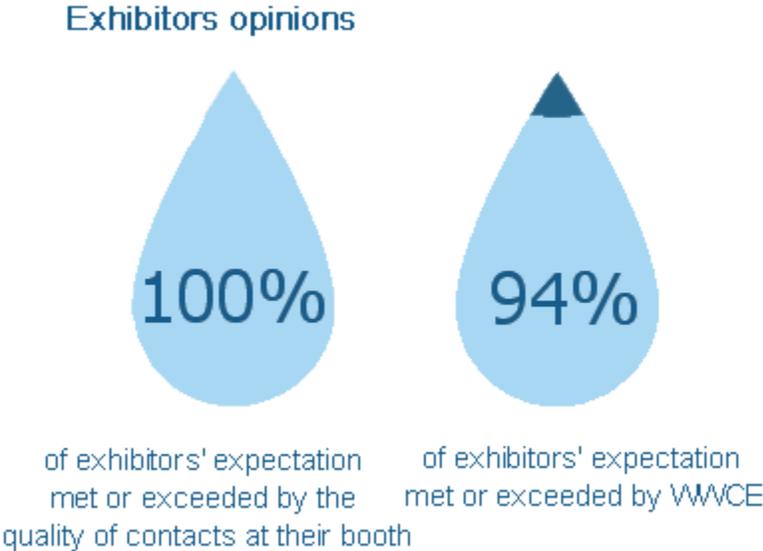

Primary Work Role

Also, the exhibition hosted the IWA – Isle Emerging Technologies & Challenge Exchange Hub with 10 selected global technology providers and their innovations. The Hub facilitated as the meeting point between utilities and innovative solution providers and it focussed on following themes: *challenges and opportunities for deployment of water of water treatment world-wide* and *challenges in water recycling from industrial waste water stream*. Finally, the exhibition was also the host for the Water-Wise Pavilion which focused on the role of connecting utilities to their cities and basins and to exchange with key urban actors rethinking utility service boundaries to transition to water-wise cities.

Some first results from the IWA exhibitor surveys:

IWA World Water Congress & Exhibition 2018 was proven to be the most useful and profitable water event to the world.

KUBOTA as a principal sponsor is grateful that the world's leading water professionals had an opportunity to get the information of Japan's high-quality water supply and sewage system such as the latest products, technologies, and services.

KUBOTA, Principal Sponsor

IWA World Congress Tokyo proved to be the perfect platform to network with the leaders in water: political, technical, research and business leaders. SUEZ is delighted to be part of this community, to foster water-wise solutions for cities.
SUEZ, Gold Sponsor

When we look back a few years from now, maybe we will say: 'It happened in Tokyo'. Since IWA Busan 2012 in South-Korea, the Watershare-platform has been growing gradually. Our members increasingly participate in knowledge sharing, tool development and the set up and execution of joint reference projects. The number of Watershare-experts participating in the IWA Congress also continues to grow. For us Tokyo marked the next phase for Watershare. So, we'll meet again!
WATERSHARE

"The IWA Exhibition is a tremendous opportunity for us to showcase Canadian Innovators to the world and to shine a light on our water leaders. We met so many international delegates and appreciated the lively atmosphere of the exhibition - to me, it seemed more like an exciting marketplace."
Robert Haller, Canadian Water & Wastewater Association.

THE AUSTRALIAN WATER PARTNERSHIP

Hosting the Australian Pavilion at the World Water Congress & Exhibition enabled us to enhance sharing of Australia's knowledge and tools for sustainable water management. It was a great opportunity to engage and collaborate with leading international institutions through a strengthened 'Team Australia' approach. A clear highlight was to see Prof Tony Wong (CRCWSC, Australia) awarded the IWA 2018 Global Water Award for his lifetime achievements.
