

IWA-ISLE INNOVATION PAVILION

Isle are excited to be joining forces with IWA and Ramboll to deliver the Innovation Pavilion at the [IWA World Water Congress & Exhibition 2020](#). The event will take place in Copenhagen, Denmark between 18th and 23rd October 2020.

The aim of the IWA-Isle Innovation Pavilion is to assist early-stage technologies globally to find a route to market or development with support from investors and end-users by running an innovation competition. Being a part of the competition will provide an opportunity for a new range of technologies to come forward.

The innovation competition will be run as separate events across four themed days:

● MUNICIPAL ● INDUSTRIAL ● INVESTORS ● CITIES

Companies are invited to be a part of the Innovation Pavilion by sponsoring one or more of the themed event days that will be running throughout the Congress & Exhibition. The differentiator for this pavilion is to use stakeholders from industry, water companies, investors and academia to funnel/evaluate technologies and offer a package of support that culminates with a clear set of pitches in Copenhagen. This support will allow sponsors to get a deeper interaction with innovative technologies.

The IWA Water Congress & Exhibition is the global event for water professionals covering the entire water cycle. As the Congress rotates through cities and countries each event has extra emphasis on issues of specific interest to the region.

ABOUT ISLE

Isle is an independent technology and innovation consultancy that brings together technical and commercial specialists to facilitate relationships. Isle has extensive in-house experience in bringing new technologies to market and an established framework to support innovation, technology development, strategy and growth and investment.
